Muhammad Maisur Rahman

SUMMARY

With a strong focus on programming since 2018, I specialize in building robust front-end and back-end solutions. My expertise lies in developing RESTful APIs and admin panels (CMS) to meet complex front-end requirements. My primary programming language is PHP (Laravel), complemented by proficiency in JavaScript (Node.js, NestJS, Strapi, Next.js) and Python (Django, FastAPI).

I am a fast learner who enjoys exploring new technologies and tackling challenging problems. I thrive in collaborative environments where I can contribute to practical, scalable solutions while continuously improving my technical and analytical skills. I value clean, maintainable code and take pride in delivering efficient, user-centered web applications that create real impact.

EXPERIENCE

BT0Z, Jakarta – *Backend Engineer*

Jan 2019 – Jan 2025

- Developed CMS and APIs, mainly using PHP and Laravel for rapid MVP development.
- Managed server maintenance and deployment for various projects.
- Collaborated closely with frontend developers to ensure seamless system integration.
